

## Rid – Gallery/Lavatory surface cleaner and reodorizer

Nuvite's Rid uses a sophisticated and extremely effective cleaning and removal action to eliminate the causes of odor and contamination of surfaces. It uses a dynamic surface activity to counteract the cause of both odors and unsanitary conditions. In addition, Rid uses a unique reodorizing element to either neutralize or add a mild, pleasant aroma to hard surfaces. Rid is specifically formulated for cleaning metals, plastics and other hard surfaces found in commercial food preparation areas, aircraft, bus, train and marine lavatories, and galleys as well as in homes. Rid is safe to plastics, rubber and all metals, and is completely biodegradable.
