

NuGear SC - Engine and Component Degreaser

Nuvite NuGear SC is a heavy duty aqueous cleaning compound for aircraft engine and component degreasing operations. NuGear can be used for hand cleaning as well as in hot immersion tanks and spray cabinets. It has been specifically developed for superior wetting and penetration and has been reformulated from NuGear Double Concentrate for engine shop operations and does not contain petroleum distillates. It will provide safe and effective cleaning at economical cost while conforming to stringent water, air and environmental regulations. NuGear SC has specific approvals for use by Pratt & Whitney, Rolls Royce and General Electric for engine overhaul operations.
