

## 7" Circular compounding buffer

This is the circular buffer Nuvite recommends for the "compounding phase" of metal polishing with NuShine II. Use this great variable-speed (1000-3000 RPM) electronic speed controlled buffer with Nuvite NuShine II compounding grades F7,F9,G6, and C to "heal" the surface so that it is ready to take the final finish step - "That Nuvite Look" offered by the finishing step with an orbital buffer and Grade S.

### Features:

- 11 amp motor with electronic control for constant speed under load
- "Soft" start, locking trigger & three-position head handle
- 5/8"-11 spindle w/lock
- 100% ball and roller bearing construction
- Comes with standard rubber backing plate, wrench and loose wool sleeve

NOTE: Order the hook-and-loop mount backing plate below (Nuvite EQ-143 hook backing plate) to use recommended compounding pads.
