

Wool compounding pads

Circular buffer compounding pad as recommended in Nuvite Detailed Metal Polishing Procedures. 7" diameter with 1" tufted wool face trim and hook & loop drive backing, or, center drive hole may be used. Works great with Nuvite #EQ-136 circular compounder/buffer, or most other popular brands of circular buffers. Use with Nuvite F7 & 9, G6, or C compounding grades to "heal" the aluminum surface so it is ready to take "The Nuvite Look" final step with orbital and Grade S. Buy several, as we recommend changing pads each time you change grades for best results. Cleanable.
