

CITRICUT CONCENTRATE

CITRUS-BASED CLEANER FOR WETWASH & DEGREASING

For periodic cleaning of exterior surfaces in dilutions determined by the extent, condition & type of soil to be removed

When using any NUVITE product, please refer to appropriate procedures and recommendations for use and equipment, or contact a NUVITE technician for more information, unique applications and special requirements.

WETWASH

1. Dilute 1:12 to 1:20 with water, depending upon soil conditions & cleaning frequency.
2. Apply to surface by spray, mop or foam pad application.
3. Agitate to loosen soil.
4. Rinse with water.

WIPE DOWN / DEBUG

1. Dilute 1:12 to 1:15.
2. Use trigger spray bottle and spray area within reach.
3. Agitate with terry towel sprayed with the same solution.
4. Repeat to remove heavy bug soil if necessary.
5. Wipe dry with dry terry towel.

HEAVY-DUTY CLEANING/GEAR, WHEEL WELLS, FLAPS, COWLINGS

1. Depending on soil conditions, use full strength concentrate or up to a 1:8 dilution.
2. Allow to soak 15 minutes.
3. Do not allow soaked area to completely dry.
4. Rinse with high pressure water.
